Profile

Full Stack Engineer specialized in web development, with an interest in artificial intelligence. Proficient in **Spring Boot**, **Angular**, and **.NET**. Able to design microservices architectures and deploy containerized applications. Detail-oriented and focused on delivering clean, scalable, and high-performance solutions.

Experience

Full Stack Engineer (Spring & Angular), Hosinox Company January 2026 – Present

- Developed and maintained an enterprise ERP system using Spring Boot and Angular, covering complex business modules to optimize internal processes.
- Translated functional requirements into robust technical solutions in direct collaboration with product and business teams.
- Technologies: **Spring Boot**, **Angular**, **SQL Server**, **JWT**, **WebSockets**, **Elasticsearch**, **Liquibase**, **SonarQube**, **Docker**, **Git**.

Full Stack .NET Engineer, Biram Group March 2025 – July 2025

- Architected and delivered a school management web application with an online payment system for parents, enabling staff to efficiently handle administrative and educational tasks.
- Automated attendance tracking and grade management, significantly reducing manual work and improving workflow efficiency.
- Technologies: **.NET 8**, **C#**, **Blazor**, **GraphQL**, **MediatR**, **Entity Framework Core**, **.NET Identity**, **SignalR**, **LINQ**, **SQL Server**, **HTML5**, **CSS3**, **JavaScript**, **Stripe**, **Docker**, **Git**.

Graduation Project Internship (PFE), Innov-Alliance-Tech February 2024 – August 2024

- Built a full-featured recruitment platform enabling candidates to submit applications, complete online tests, and receive instant results, significantly improving the candidate experience.
- Automated test management and application processing workflows, reducing manual effort and boosting operational efficiency.
- Technologies: **.NET 8**, **C#**, **Razor**, **REST API**, **Entity Framework Core**, **.NET Identity**, **SignalR**, **LINQ**, **Swagger/OpenAPI**, **MySQL**, **XUnit**, **Jenkins**, **Docker**, **Prometheus**, **Grafana**, **IIS**, **Git**.

Software Engineer Internship, PROXI WEB July 2023 – September 2023

- Developed a CRM application with an intuitive interface, simplifying customer data management and improving operational efficiency for teams.
- Enhanced the project by integrating Ethereum Smart Contracts to automate payments via an Escrow system with milestone-based releases and on-chain verification.
- Technologies: **Solidity**, **Hardhat**, **Ethers.js**, **MetaMask**, **React**, **Tailwind CSS**, **Node.js**, **Express**, **MongoDB**, **JWT**.

Education

Software Engineering Degree, École Supérieure Privée d'Ingénierie et de Technologies (ESPRIT) 2021 – 2024

MPSI Preparatory Cycle, Université Libre de Tunis (ULT) 2020

Technical Baccalaureate, Lycée Technique de Médenine 2019

Skills

Frameworks & Technologies : Spring Boot, Spring AI, Angular, React, Node.js, Express.js, .NET

Programming Languages: Java, C#, JavaScript, TypeScript, Python, PHP

Databases: MySQL, PostgreSQL, SQL Server, Oracle, MongoDB

DevOps & CI/CD: Docker, Docker Compose, GitHub Actions, Jenkins, SonarQube, Nexus, Prometheus, Grafana

Testing & Quality: JUnit, Mockito, XUnit

Tools & Collaboration: Git, GitHub, Postman, Swagger, APIDog, Jira, Trello

Soft Skills: Problem Solving, Adaptability, Team Collaboration, Creativity

Projects

Aura: Intelligent Assistant 2026

- Designed and deployed a full-stack AI assistant with microservices architecture, RSA JWT authentication, PDF RAG, image analysis and real-time scraping.
- Implemented Redis caching, Nginx reverse proxy and an automated CI/CD pipeline via GitHub Actions.
- Technologies: **Spring Boot 3, Spring AI, Google Gemini API, Spring Security, Spring Cloud Gateway, Netflix Eureka, Angular, PostgreSQL, PGVector, Redis, Nginx, Docker, GitHub Actions.**

TaskFlow: Real-Time Collaborative Kanban Application 2026

- Built a full-stack Kanban application with OAuth2/Keycloak authentication, GraphQL API, real-time notifications via WebSocket/STOMP and automation of workflows and processes using n8n.
- Implemented an event-driven pipeline with Apache Kafka, a drag-and-drop board and unit tests with JUnit 5 and Vitest.
- Technologies: **Spring Boot 3, GraphQL, WebSocket, n8n, Kafka, Keycloak, Angular, PostgreSQL, Flyway, Docker, JUnit 5, Vitest.**

AI Code Assistant Pro — VS Code Plugin 2026

- Developed a VS Code extension that analyzes code in real-time, detects bugs and security vulnerabilities, and provides automated corrections and intelligent refactoring.
- Integrated real-time AI code analysis via Google Gemini API, structured AST parsing with Tree-sitter, security vulnerability detection (Snyk API & OWASP Top 10), interactive WebView, and Git integration with NodeGit.
- Technologies: **Node.js, VS Code Extension API, Google Gemini API, Tree-sitter AST, Snyk API, OWASP Top 10, NodeGit, WebView HTML/CSS/JS.**

DevOps Project 2024

- Implemented a CI/CD pipeline to automate application deployments and testing.
- Technologies: **Spring Boot, Angular 16, Jenkins, SonarQube, Nexus, Prometheus, Grafana, Docker.**

Languages and Certifications

Languages

Arabic: Native Language

French: Intermediate (B2)

English: Intermediate (B2)

Certifications

Spring - Angular (CrocoCoder)

AI Applications for Predictive Maintenance (ES-PRIT)

AI Applications for Anomaly Detection (ESPRIT)
